WeylClean® SAS

The degreasing classic: strong and mild at once

WeylClean® SAS grades are versatile anionic surfactants with outstanding surface-active properties like strong grease removal and excellent wetting behavior in Home Care, Industrial & Institutional Cleaning, Technical Applications and Personal Care. They have a good ecotoxicological profile and show a good dermatological and toxicological compatibility. WeylClean® SAS grades are produced by sulphoxidation of n-paraffin by the Hoechst light/water process and are environmentally friendly surfactants with very good biodegradability.
