

Better chemistry – achieving more.

WeylClean[®] CC

Low temperature bleaching and hygiene

The market has an increasing demand for excellent bleaching performance at low temperatures due to a growing customer focus on sustainable solutions.

WeylClean[®] CC is a bleach catalyst, which combines excellent bleaching power with hygiene at temperatures as low as 15 °C. As a metal free oxygen transfer agent, WeylClean[®] CC acts catalytically and is therefore effective at low concentrations. WeylClean[®] CC is extremely versatile as the active oxygen can be generated in situ from three different precursor systems: TAED /sodium percarbonate, TAED/ H₂O₂ or solely H₂O₂ at high pH. WeylClean[®] CC can be used in many application areas in Home Care, I&I and industrial applications.

WeylClean® CC

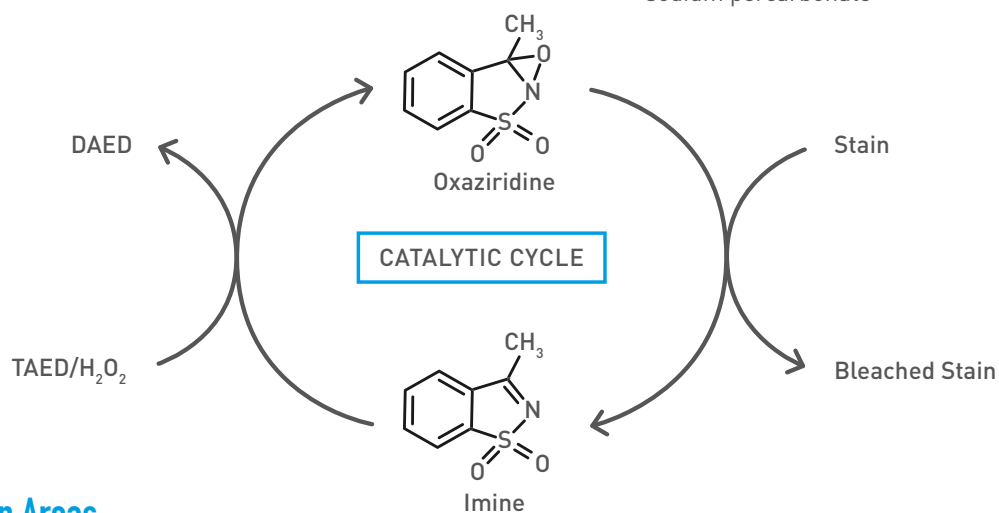

Low temperature bleaching and hygiene

Benefits

- Improved stain removal at low temperatures (15 to 40 °C)
- Bleach performance comparable to chlorine bleach but odor-free
- Additional hygiene at low temperatures
- Low usage concentration
- Safe to handle
- Acceptable level of fabric and dye damage

Product Description

- Appearance:
 - Yellow powder with min. 98% active content
 - Yellow granules with 10 or alternatively 30% active bleach catalyst
- Optimum pH for best performance can be achieved by choosing the precursor/oxidant system
- Recommended usage level: 0.1–0.3% in combination with 2 to 5% TAED and 5 to 10% sodium percarbonate

Application Areas

PRODUCT	HOME CARE				FABRIC CARE					I & I				
	Manual Dishwashing	Automatic Dishwashing			Hard Surface Cleaning	Laundry Detergents				Laundry Aids – Spot and Stain Remover	Fabric Softener	Industrial Cleaner	Institutional Cleaner	Warewashing
Liquids		Powders	Tablets	Powder Detergents		Detergent Tablets	Liquid Detergents	Special Detergents						
WEYLCLEAN® CATALYSTS
