

Better chemistry – achieving more.

WeylCare[®] CetylP

High-end emulsifying with a velvety feel

WeylCare[®] CetylP is a versatile emulsifier suitable for the high stability needs of even the most complex oil-in-water formulations. It delivers white and stable emulsions for a wide range of applications. Plus, it provides a pleasant feel to the skin.

WeylCare[®] CetylP is the emulsifier for the most challenging emulsions.

WeylCare® CetylP

High-end emulsifying with a velvety feel

Benefits

- Flexible-to-use anionic O/W emulsifier
- Long-term stability of difficult to emulsify formulations
- Suitable for high amounts of oil
- EO-free
- White-colored dispersion
- Pleasant skin feel
- Application over wide pH-range
- Skin-compatibility

Product Description

- INCI: Potassium Cetyl Phosphate
- CAS No.: 19035-79-1
- Appearance: White to off-white powder
- pH (1% aq. solution, 20 °C): 6.5 – 8.5
- Recommended usage level: 1 – 5% w/w

Application Areas
